### PROFILE

QA Analyst focused on API Testing, functional testing, regression, and E2E automation with Playwright. I use Postman daily to validate REST APIs, JSON payloads, status codes, authentication, integrations, and negative scenarios. For automation practice, I maintain a personal project that uses my Portfolio as the product under test, plus a QA Sandbox for login, filters, UI states, and mocked API responses. My previous background in L4 support, logs, Jira, and critical systems strengthens my ability to investigate issues, reproduce defects, and communicate clearly with development teams.

### QA DELIVERY STACK

|                                                                                                                                                                  |                                                                                                                                                                                 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Test APIs with consistency</b><br>Postman, REST, status codes, headers, tokens, payloads, contracts, positive/negative scenarios, and integration validation. | <b>Automate demonstrable flows</b><br>Playwright applied to my own project, covering navigation, login, filters, API mocking, responsiveness, basic accessibility, and reports. |
| <b>Document actionable bugs</b><br>Steps, evidence, severity, impact, expected/actual behavior, technical context, and objective communication.                  | <b>Investigate real issues</b><br>DevTools, logs, Jira, reproduction steps, system behavior analysis, and hypotheses for development teams.                                     |

### EXPERIENCE AND PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                   |

### CORE SKILLS

|                    |                |            |
|--------------------|----------------|------------|
| API Testing        | Postman        | Playwright |
| Functional testing | Regression     | Bug report |
| DevTools           | GitHub Actions | Basic SQL  |
|                    | Jira           |            |

### PUBLIC PROJECTS

**Rapha.QA Portfolio + QA Sandbox**  
Personal project used as a product under test for Playwright checks, with login, filters, UI states, mocked API, responsiveness, and execution summary.

#### Open portfolio

#### QA Sandbox

Controlled environment to practice login, filters, success, empty, and API-error scenarios without depending on a real backend.

#### Open sandbox

#### GitHub

Repositories, studies, and technical progress focused on QA, API Testing, Playwright, and automation evidence.

#### Open GitHub

### EDUCATION AND LANGUAGES

Bachelor's Degree in Business Administration  
Faculdade de Mantena - 2015

#### English

Intermediate conversation

#### Portuguese

Native

### COURSES

Accessibility with React  
Rocketseat - 2025

Dev Global Starter Pack  
Rocketseat - 2025

Agile Methodologies  
Rocketseat - 2024
